

JOHN LEONARD A. LIBANAN

Full-Stack Developer | Computer Engineering Graduate

johnleonardlibanan.work@gmail.com | +63 963 205 8717 | Eastern Samar, Philippines | Open to Remote

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Computer Engineering Graduate and **Full-Stack Developer** with hands-on experience building web applications, business systems, and custom software solutions through internship, freelance, and academic projects. Experienced with **React, TypeScript, Vite.js, Node.js, Express.js, PHP, Laravel, WordPress, PostgreSQL, MySQL**, and **modern web technologies**, with experience in **API development, database design, responsive UI development, CMS-based solutions**, and application deployment. Developed end-to-end solutions across healthcare, agriculture, booking, inventory management, and digital archive systems while collaborating with teams, understanding client requirements, documenting solutions, and adapting to diverse technical requirements.

EXPERIENCE

Junior Web Developer Intern

[Seek Marketing Partners](#) | [Bury, United Kingdom](#)

January 2026 – March 2026 | Remote (Philippines)

- Managed and maintained 9–10 client websites using WordPress, ensuring website functionality, content accuracy, and client-requested updates.
- Developed and updated 30+ web pages/components based on client requirements, design standards, and production workflows.
- Collaborated with a 2–4 member development team using company systems and communication tools to complete weekly assigned tasks.
- Completed 5–10+ development tasks weekly, including website updates, page creation, content adjustments, and frontend improvements.
- Implemented frontend website replicas and UI practice projects, including Dorot Gardens, to improve development workflow and interface implementation skills.

Software Lead Developer

[Rice Plant Health Monitoring System \(Thesis\)](#)

March – May 2026 | Remote (Philippines)

- Led the full-stack development of a Rice Plant Health Monitoring System with 10+ core modules, including monitoring workflows, image analysis, and data management features.
- Designed and implemented the application architecture using React, TypeScript, Vite.js, Node.js, Express.js, and PostgreSQL.
- Developed 6 frontend screens and integrated backend services with a PostgreSQL database containing 5+ relational tables.
- Implemented role-based system functionality supporting 3 user types: Farmer, Admin, and Researcher.
- Tested system workflows using 30+ image/data records to validate monitoring and analysis processes.

Backend Developer

[Infirmary Connect \(Contract Thesis Project\)](#)

April – May 2026 | Remote (Philippines)

- Developed backend architecture and database design for an infirmity management system using Node.js, Express.js, and PostgreSQL.
- Built 20+ REST API endpoints supporting appointment management, patient workflows, kiosk integration, and system operations.
- Designed and optimized a 14-table relational database structure to support application data management.
- Implemented 10+ system features and integrated backend services with the frontend application.
- Supported system testing with 20+ users through user evaluation and feedback collection.

Freelance Full-Stack Developer

Business Websites & Custom Web Applications

2023 – 2026 | Remote (Philippines)

- Developed 7+ web applications and software solutions across healthcare, hospitality, inventory management, digital archive, and business management systems.
- Built full-stack applications using React, Vite.js, TypeScript, Node.js, Express.js, PHP, MySQL, PostgreSQL, Bootstrap, and Vercel.
- Designed databases, developed APIs, implemented responsive interfaces, and deployed complete applications from development to production environments.
- Delivered academic, community, and personal software projects, including real-world system implementations for inventory and management workflows.

SKILLS

Languages: TypeScript, JavaScript, PHP, Java, C++

Frontend: React.js, Vite.js, Gatsby.js, WordPress, Tailwind CSS, Bootstrap, Swiper.js, HTML5, CSS3

Backend: Node.js, Express.js, Laravel

Databases: PostgreSQL, MySQL, Supabase

Deployment & DevOps: Git, GitHub, Vercel, Netlify, Railway, Render

Tools: Visual Studio Code, Cursor, Figma, Microsoft Teams, Slack

EDUCATION

Bachelor of Science in Computer Engineering · Eastern Samar State University (Main Campus) - 2026

CERTIFICATIONS & ACHIEVEMENTS

Certificate of Internship Completion · Seek Marketing Partners | March 2026

Programming – Java 1st Runner-Up · ICpEP Regional Programming Competition | 2025

AI Fundamentals and Prompting 101 · AI Ready ASEAN | February 2026

Cybersecurity in the Age of AI · ICpEP R3 & ICpEP KSA | January 2026

LANGUAGES

English: Professional

Filipino: Native
